

KHET MAHESHWARI

Web Developer | Angular Developer | UI/UX | AI Engineer
+92-331-8096987 · khetvaswani@gmail.com · GitHub: <https://github.com/Khet-Vaswani> · LinkedIn: www.linkedin.com/in/khet-maheshwari-8a5635269/ · Karachi, Pakistan

EDUCATION:

B.E. in Computer Systems Engineering — MUET, Jamshoro CGPA: 3.2 / 4.0 | 2022 – 2026

TECHNICAL SKILL:

Frontend Core: HTML5, CSS3, JavaScript (ES6+), React.js, Angular (current internship), TypeScript (basic), Responsive & Mobile-First Design

CSS Frameworks: Tailwind CSS, Bootstrap — rapid UI development, utility-first styling, design system implementation

UI/UX & Design: Figma (wireframing, prototyping) Figma-to-code conversion, dashboard UI, forms, tables, user flow design, UI/UX Instructor (30+ students trained)

Frontend Bonus: Next.js (familiar), Framer Motion (basic), component architecture, state management, routing, API integration

Backend & APIs: Node.js, Express.js, PHP, Python Flask, REST API integration & testing (Postman), JWT authentication, MySQL, MongoDB

Tools & Workflow: Git & GitHub (branching, PRs, code reviews), VS Code, Postman, Linux CLI, Docker (basic), Agile/Scrum — available for remote collaboration

WORK EXPERIENCE:

Web Developer (Angular Developer) Intern — The STEM Educators (Remote) May 2025 – June 2025

- Building production of Angular web applications — developing reusable UI components, implementing routing and navigation, and integrating REST APIs into healthcare-adjacent web portals and dashboards.
- Converting design specifications into responsive, pixel-perfect frontend screens — collaborating with backend developers on API contracts and data rendering within sprint cycles.

Full Stack Developer Intern — CERTURA Jun 2025 – Jul 2025

- Converted UI/UX designs into pixel-perfect, fully responsive web interfaces using HTML5, CSS3, and JavaScript — resolved 15+ cross-browser bugs across Chrome, Firefox, and Edge within a single sprint cycle.
- Integrated REST API endpoints into frontend — handling authentication flows, data rendering, and user state management across multiple user roles in a 4-person Agile team.

Freelance Frontend Developer — Upwork (Remote) 2024 – Present

- Delivered 5+ responsive, production-ready web interfaces for international clients — converting client briefs and Figma mockups into fully functional, cross-device-compatible web applications with 100% on-time completion.

KEY PROJECTS:

AI-Powered Learning Dashboard (FYP) | React.js · Flask · Tailwind CSS · MySQL · REST API

- Built a multi-role healthcare-style dashboard UI in React.js with student, instructor, and admin portals — featuring dynamic data tables, forms, progress tracking, and real-time AI-generated content rendered from 10+ REST API endpoints.
- Integrated Groq API (LLM) into front end reducing AI content generation from ~10 min to under 3 sec — designed with Figma-first approach then converted to responsive React components using Tailwind CSS utility classes.

ElectroMart — eCommerce Frontend | JavaScript · PHP · MySQL · HTML/CSS · Bootstrap

- Developed a complete eCommerce portal UI featuring product catalog, shopping cart, checkout flow, and admin dashboard — built with Bootstrap for responsive design and converted from Figma mockups to functional frontend screens.

Shopping Cart System | *React.js · Node.js · MongoDB · CSS3*

- Built a full MERN stack frontend with reusable React components, dynamic cart state, real-time price calculation, and responsive layout — achieving consistent cross-browser rendering and sub-200ms interaction response times.

Real-Time Chat Interface | *Node.js · Socket.IO · JavaScript · CSS3*

- Engineered a real-time messaging UI with room-based chat, instant DOM updates via WebSockets, and responsive layout — tested across 3 browsers for full cross-platform compatibility.

Simple Blog Platform | *Node.js · EJS · MongoDB · HTML/CSS*

- Built a server-side rendered blog interface with full CRUD user flows, clean navigation, and responsive design — demonstrating end-to-end front-end-to-backend page performance and user experience implementation.

CERTIFICATIONS:

UI/UX Design & Advanced UI/UX — SMAZ Technologies

Full Stack Development — NFTP

HTML, CSS & JavaScript for Web Developers — Coursera

Generative AI Application Developer — PEC
